PROFESSIONAL SUMMARY

Multimedia Computing graduate with experience in graphic design, digital content creation, and visual communication. Skilled in creating marketing materials, social media content, product visuals, packaging, and promotional designs. Proficient in Adobe Creative Suite with additional knowledge of UI/UX design, digital media, and creative technology. Detail-oriented and creative, with strong problem-solving skills and a passion for developing engaging and effective visual designs.

WORK EXPERIENCE

Graphic Designer

Bumimas Food Manufacturing Sdn Bhd, Segamat, Johor

March 2024 - Present

- Designed product packaging, labels, and promotional materials for various frozen food products.
- Developed product artwork and packaging layouts according to dimensions, printing specifications, and regulatory requirements.
- Created digital marketing materials, social media graphics, banners, posters, and promotional content.
- Collaborated with QA, production, marketing, management, and external printing suppliers to ensure accurate and production-ready artwork.
- Provided basic IT and technical support, including computer/software troubleshooting, printer issues, file management, and general technical assistance.

Graphic Designer (Part-Time)

Grandprint.my

November 2023 - Present

- Designed custom sublimation jerseys and sportswear according to customer requirements and design specifications.
- Created and prepared print-ready jersey artwork using Adobe Illustrator and Adobe Photoshop.
- Communicated with customers to understand design requirements, make revisions, and ensure accurate final artwork for production.

Software Developer Intern

Universiti Teknologi MARA (UiTM)

September 2021 - February 2022

- Developed and maintained software applications using Flutter and Dart based on project requirements and user needs.
- Identified and resolved software issues through debugging, testing, and problem-solving during the development process.
- Assisted with system and technical tasks, including application configuration, software troubleshooting, and resolving technical issues.
- Collaborated with team members to support software development activities, documentation, testing, and system improvements.
